Enduring, Surviving, and Thriving as a Law Enforcement Executive

This *cost-free* New Chiefs' of Police Orientation is the one course a top law enforcement administrator must have to lead their department into the future.

The course presents concepts, strategies, and information necessary for new police chiefs to efficiently and effectively lead their organization. The successful police chief must be many things to many people and sets the tone for the organization. The chief's role calls for an awareness of multiple constituencies and agendas.

Police chiefs are leaders by the time they become chiefs, but leadership is a skill which undergoes continuous refinement and improvement. Command level training for Chiefs is crucial for leadership development, operational excellence, interagency collaboration, and professional growth. Essential to survival as a police chief is a clear awareness of certain political realities that accompany the job and environment.

Course topics include:

- Leadership Development
- Political Survival
- Mandated Requirements of Illinois Law Enforcement Agencies
- Legal Aspects of Police Leadership
- State and Federal Resources and Professional Associations
- Professional Networking

Please note: Chief appointment date must be within 6 month of training, or within the previous 18 months.

Tuition and Lodging

Tuition and lodging* for Illinois local law enforcement will be provided by the ILETSB Executive Institute.

*Must live and/or work 40 miles or more from the training site
